STATE WATER RESOURCES CONTROL BOARD  
DIVISION OF WATER RIGHTS

ORDER

APPLICATION 17662

PERMIT 11257

LICENSE 6994

ORDER CORRECTING PURPOSE OF USE

WHEREAS:

1. License 6994 was issued to City of Trinidad and was recorded with the County Recorder of Humboldt County on March 23, 1964 in Volume 780, Page 182.
2. A petition to correct the purpose of use has been filed with the State Water Resources Control Board and said Board has determined that good cause for such change exists.
3. The correction is needed to change the purpose of use from Municipal to Standby Emergency Municipal Use.
4. The Board has determined that said correction will not initiate a new right nor operate to the injury of any other lawful user of water and that good and sufficient cause has been shown for said correction.
5. License 6994 does not contain the current standard provisions pertaining to the Board's continuing authority and public trust responsibilities.

NOW, THEREFORE, IT IS ORDERED THAT:

1. The purpose of use under this license shall be as follows:

Standby Municipal Use

2. The following standard provision pertaining to the Board's continuing authority and public trust responsibilities shall be added to License 6994 pursuant to Section 780 of Title 23 of the California Code of Regulations. Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this license, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this license with a view to eliminating waste of water and to meeting the reasonable water requirements of licensee without unreasonable draft on the source. Licensee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic

growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this license and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the licensee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.
